

**Immediate telephony or internet access?  
With the Hubb@<sup>®</sup> these services can be up and  
running in less than 5 minutes!**

The Hubb@ is a unique, patented 3G Access Gateway that enables businesses with an urgent short-or-medium-term telephony and internet requirement to have these services up and running in less than five minutes.

The Hubb@ solution is available for sale in 2, 4, 6, or 8 user bundles - or we are able to provision a complete turnkey solution for our customers.

Each Hubb@ bundle comes with either Cisco or Linksys IP desk phones, inbound and outbound numbers, Hunt Group functionality, voicemail-to-email and fax-to-email services. The additional, chargeable functionality options include, IVR, Music-on-Hold, and Call Queuing.

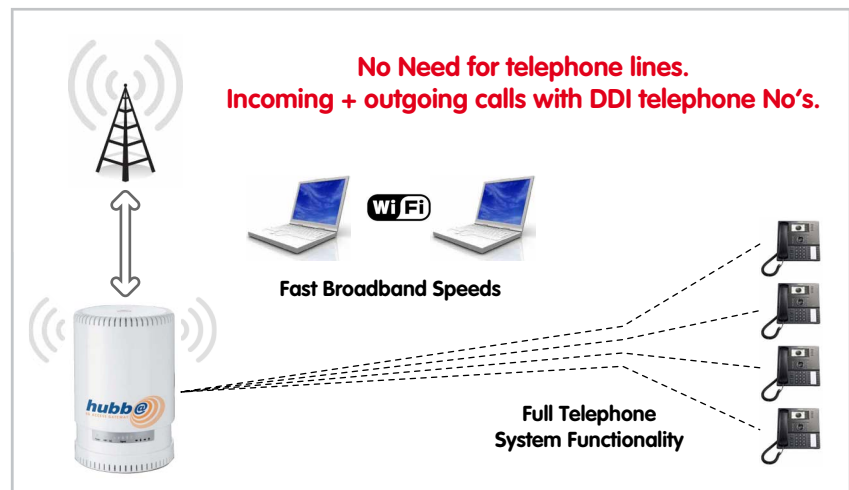

It's simple to set up. Just plug the Hubb@ into the mains, connect the IP desk phones, configure any wireless laptops with the relevant WPA key and start making calls that terminate on the PSTN network, via the Comms Provider VOIP gateway.

**A Four Phone Hubb@ Network Example**

**Key features. The Hubb@:**

- is provisioned with a 3G mobile network SIM that best suits the user's geographic area;
- locks onto the fastest data signal, not just the nearest, and provides increased data rates;
- the WiFi has a 50m range and the Hubb@ can lock onto a 3G signal up to 15km away;
- has an upload speed typically five times faster than a dongle;
- requires no additional software installation;
- can plug into a Samsung PABX (with an MGI card) or Mitel PABX as a fail-over service;
- can be used with IP CCTV cameras for instant, remote surveillance needs;
- could be used for credit card transaction services;
- offers a complete plug'n'play telephony and wireless, or fixed, WiFi solution.

**Where Hubb@ is being used:**

- disaster recovery;
- temporary backup for failed telecoms or internet services;
- the emergency services;
- security services and businesses;
- outside broadcast media units;
- temporary offices;
- outside events such as music festivals etc;
- business and consumer markets/fairs/exhibitions;
- areas where there is a poor ADSL/SDSL service.
