Phone Installation

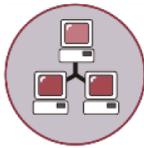

- | | |
|---|--|
| 1 | If a headset is used, connect it to the headset port . |
| 2 | Connect a handset to the handset port of the phone. |
| 3 | Connect one end of the PC connection LAN cable, which was provided with the phone, to the PC connection port of the phone. Connect the other end to the PC network port. |
| 4 | Connect the LAN cable connected to the network to the LAN connection port of the phone.
- When power is supplied from LAN port (PoE), the phone is booted upon LAN connection. |
| 5 | If PoE is not supported, connect the power adapter to the power connection port . When the plug of the connected power adapter is plugged into the outlet, the phone is booted up. (the power adapter is purchased separately.)
- When connecting the power cable, make it go through the center hole of the phone cradle. |
| 6 | If a USB is used, connect a USB to the USB connection port. |

KEY FUNCTIONS

IP Network

The SMT-i6010/6011 phone enables voice telecommunication through an already-installed data network, without requiring the installation of an additional telephone line. Therefore, it does not require the additional expense of maintaining telephone numbers, and can save on telephone costs for the businesses, and people, that use international phone calls frequently.

Bluetooth Headset

A user can talk to a counterpart by connecting a wireless Bluetooth headset to the phone.

Bluetooth Smart Phone Mode

Connect the phone and a smartphone via Bluetooth, then you can use the phone to take the call received to the smartphone and you can also use the call move function.

Call Park

If you must interrupt a call, you can put the call on hold or transfer it to another person using the Call Park or Call transferring function.

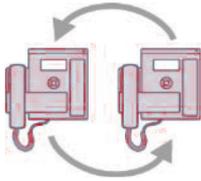

Conference

During a call, you can have a conference call with others by pressing the **[Conference]** button.

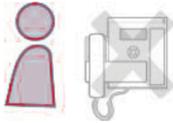

Call Forward

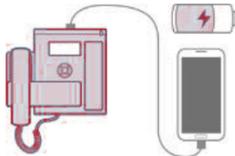

A call can be forwarded to another number when the call cannot be received.

DND

If this function is selected, the phone does not ring even when a call is placed to the phone.

USB Charging

With a phone to which a power adaptor is connected, you can use the USB charging function. (When PoE is connected, the USB charging function is not available during call.)

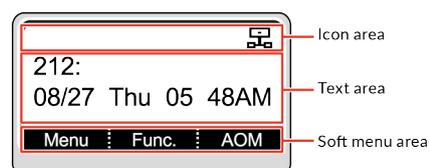

Making & Recieving a Call

Dialing	Station Line	 or press  button → Enter phone number → Select [Call] from the soft menu.

Area	Description
Icon area	Displays various icons.
Text area	Displays the information (e.g., message, phone number) entered by a user as well as the date, time, etc.
Soft menu area	Displays the functions allocated to the 3 soft buttons. Function menus are provided depending on the situation -busy or standby-as defined in the phone. A user can use the function menus by pressing the [Func.] soft button.

Correct Disposal of This Product

(Waste Electrical & Electronic Equipment)

(Applicable in the European Union and other European countries with separate collection systems)

This marking shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.
